

Update Tasks

Step	Export Category	Task	Details
1	*	Make sure at least version 3.3.1 of the openbi Framework is installed	The new version solves some issues with Batch Management and BO Connection Template Check
2	*	Run the biExport Installer	The new installer executable automatically detects all open bi Repository installations on the server and the currently installed plugins. Select the plugins that you want to update / add.
3	*	Define parameter EXPORT_ENGINE_PDF to WEBKIT	To produce PDF exports in better quality
4	Lumira Discovery	Install version 2.7.0 of the Lumira Export Extension	
5	Lumira Designer / Design Studio	Install version 2.8.1 of the Design Studio Export Extension	Parameters that were contained in the "Deprecated" group have been deleted, along with their script methods and simplified notation.
4	Lumira Desktop	Install the Lumira Export Extensions for PPT, DOC, PDF, XLS
